Our Values

At AltamarCAM we encourage a culture based on shared and long-lasting values, nurturing trust in all our relationships with clients, staff and society.

The client comes first

Our clients' interests are our number one priority.

Only consistently adding value and doing what is best for our clients will we be able to earn their trust and enjoy success together in the long term.

A focus on people

People are our most important asset.

We look after our team. We encourage mutual respect, co-operation, diversity, open communication, teamwork, welfare and work-life balance.

Alignment

We have a partner-based approach.

The interests of all key stakeholders (management, shareholders and staff) are aligned with those of our clients through our investments in the firm's funds and capital. Our compensation policy is linked to the success of our clients.

Long-term vision

We always think in the long term.

We build lasting relationships with clients, managers and staff.

Excellence

We seek excellence in all we do.

Our commitment to excellence is based on the knowledge and experience of our team, the motivation and responsibility of each member of staff and our culture of continuous innovation.

Responsibility

We act responsibly as a company and as individuals.

As a company, we contribute positively to society and maintain the strictest ethical standards. As individuals, we act with integrity and conscientiousness in all areas of our lives.

Organizational Areas

An attitude of service to the external and internal client ensures precise processes, innovation and excellence in all the firm's areas.

During 2022, the **Corporate Development team** continued to support the Co-Chairmen and CEO monitoring the markets situation, AltamarCAM's competitive landscape and in the identification and analysis of potential inorganic growth opportunities for the firm. The team continues to work closely with other departments regarding firm corporate governance matters.

The **Finance Department** has successfully completed the audit process of the consolidated group in 2022. The Financial Committee (created in 2021) coordinates all the finance functions globally, and has helped to create a roadmap of key milestones to be achieved in the coming years. As part of this roadmap, the department has started a process to redefine the technological requirements needed to meet the Group's strategic priorities.

In 2022, the **Portfolio Analytics** team continued to focus its efforts on strategic goals such as digitalization, data quality and transparency, reducing internal risk and enhancing transparency in communications to LPs. This was achieved by providing high quality and consistent portfolio data for all asset classes, cross-team analytical support, enabling every department to perform their essential analytical duties, and scalability and resource optimization through continuous efficiency improvements in process automation at every level, without loss of quality.

The **Funds Finance and Operations** department continued improving its processes and controls during 2022, creating a more scalable firm where operational risks are better monitored and mitigated. The firm's digitalization plan continues to improve the quality of administration services provided to clients. We take full advantage of technology, and two examples of this are the digital onboarding process

5. Digitalization

[Investing in the future](#)

for clients and using artificial intelligence in the portfolio monitoring process.

The **Talent** department has fully integrated cross-functional processes in all offices, carrying out transversal processes for recruitment, training and development, as well as compensation. In 2022 we welcomed more than 33 new full-time hires and 56 interns globally. Our teams received more than 450 hours of training throughout the year, allowing us to expand our knowledge and keep up to date with the latest industry trends, developing the key skills that will allow us to continue growing. In this way, we can proudly say that we are fostering internal growth, ensuring that our teams are well prepared to take on greater responsibilities. The firm is proud of its gender, cultural and intergenerational diversity, and our employees come from 18 different countries.

During 2022, in addition to their day to day responsibilities, the **Legal Department** worked intensively on the establishment of umbrella vehicles in Luxembourg, the coordination of the legal aspects to accommodate the internationalisation of the business and its client base, and the creation of numerous new separately managed accounts.

The **Risk & Compliance** department constantly seeks to ensure compliance with internal and external law, while mitigating risks and incorporating best practices throughout the organization. The AltamarCAM Group has a robust and reliable internal control system, as evidenced by the reports published last year by internal and external auditors as well as external experts, related to the prevention of money laundering and terrorist financing.

The **Facilities Team's** main challenge was to coordinate the refurbishment of a new area of AltamarCAM's offices in Madrid, comprising 600 square meters on the 12th floor, to accommodate all Central Services. As a result of the works, completed last October, Corporate Development, Finance, Legal, Compliance, and Talent can work and collaborate closer together in a shared physical space, creating many synergies between them.

The **IT Department** continues to strengthen its contribution to setting AltamarCAM apart through the importance that the firm places on innovation and on our IT Transformation Plan, which enables us to deliver services efficiently and continually

Investing in the future

Dear investors,

We are pleased to share with you our 2023 Annual Report, published just after our Annual Investors Meeting on June 1st, 2023, in Madrid.

We would like to begin our letter by emphasizing that **at the heart of our strategy is a strong focus on clients**. We believe that serving our clients exceptionally well will both strengthen our franchise and deliver a solid performance and returns to our investors. **We always put clients at the center of everything we do.**

Altamar and CAM are now fully integrated, as one firm, which helps bring to bear our talent capital and investment experience across all our businesses / asset classes to **serve our client franchise** in Spain, Germany, Latin America, Europe and other parts of the world in a more integrated and comprehensive manner.

2022 was undoubtedly a **challenging year for most asset classes**, and we are still sailing in an uncertain economic environment, with rapidly changing monetary policies from central banks posing difficulties for both limited and general partners. Nonetheless, AltamarCAM has demonstrated its ability to **deliver a robust response to these challenges**, with more than €17.9 billion of capital historically committed by investors, a team of more than 250 professionals, of which more than 80 are investment professionals, and a global presence across seven offices in five countries, all while maintaining a strong ESG focus. **Our results reflect our expertise and capacity to overcome these challenges.**

Furthermore, we celebrated another milestone by **opening offices in London and Munich, expanding our global reach**. In Munich we further strengthened our management team with the appointment of Frank Amberg as Managing Director and Head of Infrastructure Germany. While private equity remains our largest asset class, infrastructure is a significant part of our growth strategy going forward. Munich is a key private markets location for both GPs and LPs, and its importance is paramount to enhance our presence in Germany, while also providing access to an attractive talent pool.

4. Investment Banking and Distribution Businesses

5. Digitalization

Investing in the future

Another significant achievement for us is **the consolidation of our position as multi-asset class experts, providing leading investment solutions for our clients** across Private Equity, Venture Capital, Life Sciences, Infrastructure, Real Estate, and Private Debt. This enables us to provide tailored and complex investment advice, rooted in our conservative and risk-averse philosophy that emphasizes capital preservation while targeting attractive risk-adjusted returns in the medium and long term.

Embracing technology has been and continues to be one of our priorities, as access to information generates enhanced private markets insights and improves operational efficiency for our investors. Our IT Transformation Plan has enabled us to deliver services efficiently while continually pursuing improved customer experiences. **We are confident that we provide our clients with state-of-the-art technology and IT solutions that are second to none in the private markets.** Additionally, our high degree of commitment to cybersecurity, maintaining the highest level of technological compliance, enhances AltamarCAM's position as a trusted firm within the sector.

We are pleased with the progress of our funds and are excited by the **launch of ACP Aliath Bioventures II**, AltamarCAM's second life sciences venture fund and **our first impact vehicle, under the Sustainable Finance Disclosure Regulation (SFDR)**. The sustainability profiles of its portfolio companies are an essential part of its strategy. We are also heading towards a **successful final closing of Galdana Ventures III, after which Galdana Ventures' cumulative AUM will surpass €1.66 billion.** Furthermore, we are thrilled to highlight that since the launch of **ACP Secondaries 5**, our fifth dedicated secondaries fund, in February we have raised circa **€400 million**, reaching about one third of our targeted size.

In 2022 we launched Navigating Private Markets, **a monthly newsletter analyzing the trends and challenges faced by different asset classes.** The goal is to offer valuable, high-quality, differentiated content for AltamarCAM's investors. In the seven editions released so far, we have reviewed the latest market news and shed light on several interesting facts related to our fund offering and strategy across all asset classes, generating and maintaining a large and stable audience.

We find ourselves in a challenging and rapidly evolving global environment where **sustainability is becoming a paramount pillar** of any business. The increased sophistication of investors,

Key figures

Global CEO

2. Client Solutions and Services

3. Investment Businesses

4. Investment Banking and Distribution Businesses

5. Digitalization

Investing in the future

tougher regulatory requirements, and access to data are transforming investment strategies, as well as investors' appetite and needs.

Our ESG efforts and progress have not gone unnoticed, as we received four awards in 2022 for our innovative work in the field of sustainability, reinforcing our position within the industry and recognizing our commitment to the development of technology-based projects that respond to current social and environmental challenges.

We understand the importance of ongoing dialogue and engagement with our stakeholders around these vitally important issues, and **we will continue to invest with managers committed to positive returns while also addressing the biggest challenges faced by society and our environment.** We aim to deepen our knowledge through **the implementation of best practices in sustainability.**

We also recognize that a shift in the mindset of market players is required to change the perception of the investment world. The challenge lies in **designing investment strategies and policies whose objectives align with goals like enhancing energy transition.** We believe that private markets are well-positioned and have the resources to make a difference, **identifying investment opportunities with the potential to lead the transition to sustainability in our economies.** Thanks to AltamarCAM's culture, based on integrity, transparency, and sustainability, we are sailing in the same direction: to **achieve a more responsible investment environment.**

Lastly, we want to express our gratitude to our employees for their commitment and hard work, which makes AltamarCAM's success story possible. We also thank our clients for their trust in our company and assure them that we will continue to strive for excellence in every relationship and service we provide.

Sincerely,

Claudio Aguirre

Investing in the future

Dear investors,

I would like to start my letter with an overview of AltamarCAM's performance in 2022. I am proud to highlight that we have excelled in four significant aspects: **our ability to adapt to the challenges posed by the market, we continued to deliver superior performance across asset classes during 2022 versus all relevant public market benchmarks, our ability to raise significant additional capital hitting another record year, and our improved performance and continued commitment to sustainability and ESG criteria.**

There is no doubt that 2022 has been quite a complex year in many respects, and as a result of that, public markets across virtually all asset classes have shown fairly negative performances last year. In fact, if we look at the traditional "60/40 Listed Equity/Debt Portfolio", 2022 has been the worse year on record since 1937, affecting the overall performance of many portfolios, in particular those that have not yet included private market assets to their portfolios.

 the future

At AltamarCAM, 2022 was also a year in which we saw positive absolute performances in all asset classes other than venture (which saw a ca.10% decline in the year), but however, we have significantly outperformed all relevant benchmarks. Our venture funds did very well when compared to the significant declines experienced in the Nasdaq index and in the technology space as a whole.

There is also no doubt that we **continue to operate in an environment of uncertainty** brought about by increased inflation, international and geopolitical instability, and highly volatile energy and commodity prices, but we remain vigilant to navigate these challenges and capitalise on new investment prospects that always appear during times of uncertainty.

From a fundraising standpoint, 2022 was a record year as we have raised more than €2.1b of additional AUMs. And thus success was centred not only in the more than €1b of capital raised for our different funds, but also the more than €1.1b raised for those clients which have chosen to operate with our AltamarCAM Client Solutions (“ACS”). In effect, **ACS has cemented its position as the private assets solutions provider of choice for leading global institutional investors and family offices**, supported by AltamarCAM’s 360° platform. We put in a tremendous amount of effort **to offer bespoke exceptional service to our clients** that stands out in the market according to the valuable feedback by our investors.

As all of our investors know, **ESG sits at the core of our culture and investment DNA and brings potential long-term financial opportunities**. At AltamarCAM, we are committed to positioning ourselves as a driver of change within the industry. We are thrilled to have received **four awards in 2022 for our innovative work within sustainability, supporting our vision**. On the other hand, amidst the ongoing process of digitalization, we believe in **delivering superior service and reporting to our investors, with cutting-edge technological solutions**. To achieve this objective, we have made **substantial investments in our IT department to further develop Altamar Plus**. This solution is unparalleled among private market providers worldwide, and combined with our **tireless efforts in the field of cybersecurity positions us a leading firm in the private markets arena** when it comes to technological innovation.

Now, I would also like to take some time to review AltamarCAM’s different investment areas and how they have evolved over the past year.

Key figures

1. Message from our management

 Global CEO

2. Client Solutions and Services

3. Investment Businesses

4. Investment Banking and Distribution Businesses

5. Digitalization

Investing in the future

Our **Client Solutions** team designed and launched new programs in 2022 with a **total investment capacity of nearly €1.3b for leading financial institutions, family offices, and private banks.**

This additional investment capacity brings the Client solutions team to more than €6b of total investment capacity across 25 managed accounts (SMA's). These programs span all asset classes, including Private Equity, Private Credit, Real Estate, Infrastructure, and Venture Capital. Over the course of 2022 the ACS professionals analysed and executed on a total of 129 investment opportunities from top-tier GPs to our clients.

Our **Private Equity** team invested €754m in 2022 and received distributions from underlying funds of approximately €814m, achieving over 20% net IRR¹ in **our three most recent programs** (ACP Secondaries 4, Altamar X Global Private Equity Program, and CAM VI). We are pleased to report a **positive initial investor response to our fifth secondaries program, ACP Secondaries 5, which has already raised circa €400m during the last few months,** and we expect to reach half of the target in the next few months.

We are confident in the continued progress of the digital revolution, despite significant challenges and market corrections in 2022. In this context, **Galdana I and Galdana II** vehicles accumulate a net IRR between 19% and 20% as of Q4. During 2022, **Galdana's portfolio exits consisted of 7 IPOs (4 of them in China) and 41 M&As.** Cumulative exits now amount to 139 IPOs and 142 M&As. The **Galdana Ventures III Programme is currently finalising its fundraising period, having surpassed €640m.**

Our **Life Sciences** focus remains on investments in disruptive therapeutics, technologies, medical equipment and healthcare assets that respond to unmet medical needs, facilitating better access to healthcare with a huge impact on our society. In 2022, **despite the venture market going through a market down cycle, Alta Life Sciences Spain I FCR's (ALSS I) portfolio MOIC reached 1.27x TVPI,** and the fund-level TVPI did not experience significant changes (1.02x in 2022 vs 1.03x in 2021).

We are excited to announce that during the first quarter of 2023, **we launched our second healthcare venture fund, ACP Aliath Bioventures II FCR.** The new fund is an **impact fund and AltamarCAM's first Article 9 vehicle under the Sustainable Finance Disclosure Regulation (SFDR).** ACP Aliath Bioventures II FCR aims to invest in sustainable companies operating in the healthcare sector with a European focus.

5. Digitalization

Investing in the future

Our **Real Assets** portfolio has shown **strength in the current economic climate**, with **significant increases in both our Infrastructure and Real Estate valuations**. We **successfully launched ACP Infrastructure Income III program in May**, focusing on **an asset class that is well positioned to navigate high inflation and interest rate environments**.

With regards to **Private Credit**, our portfolios have also performed favourably, **with stable returns and moderate levels of risk**. This asset class has performed as a **source of income for our investors**, with floating rate coupons helping to mitigate the impact of rising interest rates.

Another important pillar of AltamarCAM's strategy is our steadfast commitment to continue to deliver strong and efficient solutions for our clients. And our continued investments in our proprietary and state-of-the-art IT platform have enabled us to be at the forefront of the global technological revolution, and to be able to provide the best possible services to our clients.

At **AltamarCAM**, we are not only committed to delivering strong financial returns to our investors, but **we also take pride in our social responsibility as corporate citizens**. Our **AltamarCAM Foundation's activities are growing every year and the combination of our modest financial contribution alongside with the effort and dedication of our team, has made a significant impact on the lives of many people**. And I want to specially thank all those who have personally contributed to this effort. I am very proud of our team's contribution and very happy to report that last year 78% of our team engaged with the Foundation, directly participating or volunteering with 1,199 direct beneficiaries.

Finally, I would like to thank our team for their dedication and our investors for their continued trust in our company. We remain committed to delivering the best possible service and results for our clients, and we look forward to continuing our work in 2023 and beyond.

Sincerely,

José Luis Molina

Our **Funds, Customised Investment Programs** and **Solution Proposals** give investors the chance to obtain attractive returns through global investments in Private Assets in the categories of Private Equity, Venture Capital, Real Assets, Life Sciences and Credit.

We are firmly convinced that the way to earn the trust of our clients is to put their interests first. Everything we do revolves around how to create long-term value for our investors and together obtain results and success.

Our mission to be trusted partners has enabled us to forge strong relationships with our investors that have grown over time. Our service is based on a deep understanding of the needs of each of these clients, offering bespoke investment strategies and solutions with high added value, a dedicated service and absolute transparency. In addition, we strive continuously to maintain an open and effective relationship through which we can transfer our knowledge to clients. That is why the team will assist with trainings, roadshows and webinars anytime the client requests it.

Our global Investor Relations team, comprised of experienced Relationship Managers (RMs) and a large support team, has excellent technical resources at its disposal and locally relevant knowledge of specific aspects that affect our investors. Its main goal is to provide a quality service that satisfies the needs of each investor based on trust, transparency, commitment and shared interests.

Tailored Solutions

Growth and sophistication of the Private Assets Industry has led to a rising complexity when constructing long-term investment portfolios.

As Private Assets represent an increasingly relevant part of investment portfolios, many investors have sought greater exposure and control over their programs, considering alternative structures.

AltamarCAM Client Solutions constructs long-term Private Assets Investment Programs adapted to Clients' needs and investment objectives, currently managing / advising ca.€6b in such Programs and having committed +€850m in 129 Global Investment Opportunities during 2022.

The **advantages** clients gain from such Programs include, amongst others:

- Access to **best-in-class global investment opportunities**, investing alongside the **most prestigious managers worldwide**.
- **Proactive portfolio construction** with access to state-of-the-art investing and monitoring tools.
- Implementation of the Programs through **efficient structures** managed and advised by Private Asset experts.
- **Optimization of recycling effect** and cash flow profile leading to long-term value creation and capital appreciation for our Clients.

Investment philosophy and value generation

AltamarCAM's investment programs are based on the mainstays of a long-term perspective, capital preservation and the quest for alpha.

The funds managed by AltamarCAM Partners have applied this investment philosophy since the first program that was launched.

In our search for ways to protect our investments we are constantly asking ourselves: Why do we think we will recover our capital? What could go wrong? How can we eliminate the risks of this investment?

This process is applied to all the firm's investment areas, with our investors benefiting from the broad and in-depth knowledge provided by our global multi-asset platform.

It's not a case of having a lot of investments but rather of building a robust investment portfolio with low correlation. We deploy our resources where there is value.

Our investment teams work on Primary, Secondary and Co-Investment opportunities, giving AltamarCAM a competitive edge by developing long-term, value-added relationships with fund managers. Our flexible investment approach, global presence and multiple asset classes give us privileged and preferential access to the best investment opportunities.

Private Equity

Access to the asset class in partnership with the best managers globally, with a focus on responsible alpha generation and capital preservation.

2022 has been another strong year for the Private Equity team:

- ~€754m of invested capital, including commingled funds and SMAs.
- ~€814m of distributed capital, including commingled funds and SMAs.
- Achieving over 20% net IRR across our three most recent programs: ACP S 4, ACP PE 6 and CAM VI (excludes ACP PE 7 as it is still in the early days of building its investment portfolio and returns are not yet relevant).

The Private Equity team is expecting to take advantage of the opportunities in the market by continuing to partner with the best managers globally through our current offerings:

- **ACP PE 7**, our latest program investing mainly in buyout funds in Europe and North America, actively fundraising, with some exposure to emerging markets and special situations managers as well as co-investments and secondaries.
- **ACPS 5**, our global secondaries and co-investment fund, which is currently actively fundraising. The fund held its first close in 1Q23 and will be investing in what we believe will be a very interesting moment of the cycle.

Note: Past returns are not necessarily indicative of future results given that the current economic conditions are not comparable to prior conditions, which may not repeat in the future. There is no guarantee that the Fund will have similar results as previous funds.

Relevant Market Trends

- **Private Equity continues to grow and evolve.** The growing Private Equity market size has given rise to increased complexity and competition, which favors managers with scale and experience.

EU/NA Buyout AuM Breakdown & Dry Powder vs. Investment Volume (\$b)

Source: Preqin

1. The average investment volume has been calculated between 2018 and 2021 taking into account the amount of capital called for each of these years.

- **Dry Powder levels remain healthy despite growth.** The increase of dry powder amounts in absolute terms has been accompanied by a healthy investment pace. Since Q1 2022, the market has increasingly been experiencing lower fundraising and investment activity.
- **2022 experienced high volatility in global economies and markets,** exacerbated by the war in Ukraine. These came mainly from continued disruptions in supply chains, overall continued inflation, increasing interest rates, difficult debt markets and a general slow-down in growth of global economies.

This situation has slipped into 2023 and there continue to be expectations for inflation and weaker economic growth ahead.

PE Buyout and Growth Fund Outperformance vs Traditional Asset Classes

Source: Eikon; 10-year horizon pooled net IRR

IRR Buyouts & Growth 1st + 2nd Quartiles
 IRR Buyouts & Growth
 MSCI World
 Bloomberg Barclays Aggregate
 Bond Index

- **Market valuations have generally been resilient in 2022.** A reduction in valuation comps has been offset by strong company-levels' operating performance. Managers are prepared for potential slower growth and increasing margin pressure during 2023. Driving growth and efficiency in the portfolio continues to be critical.

- **From an LP perspective, diversification and manager selection continue to be key.** In uncertain times, portfolio diversification (by vintage, strategy type, sector, region and deal size), combined with a rigorous due diligence process, will remain the main tools for protection.

- **The best Private Equity managers focus on fundamentals and value creation to navigate uncertainties.** Key priorities are the selection of secular growth themes, locking-in assets at the best possible valuation, identifying leaders with strong competitive positioning and pricing power, and transforming businesses to grow both organically and through acquisitions.

- **The secondaries market has experienced a consolidation of the GP-led segment,** which represented roughly 50% of the market in 2022. The search for optimal liquidity alternatives in an uncertain environment is an additional driver for growth during 2023. The need for LPs to re-balance their portfolios to cope with the denominator effect and risk budgets is giving rise to more LP-led transactions in 2023.

- **Private Equity has proven to outperform other asset classes in the past,** especially during downturns.

5. Digitalization

Investing in the future

The **ongoing digital revolution** continues firmly on its course, despite significant market challenges during 2022 triggered by increasing inflation and interest rates, impacting all financial assets, and tech assets in particular. In this context, the mature Galdana vehicles have a net IRR between 19% and 20%² as of Q4.

In terms of **valuations**, Galdana I and Galdana II experienced drops during 2022, although below public benchmarks of 7% and 19%-22% respectively.³

- Venture Capital valuations have corrected, especially in the late stage where the correlation with public tech indices is larger. Valuation multiples are now back to normalized levels.

Strong fundamentals persist for those companies in the Galdana funds’.

2. Galdana I FCR class A1 20%, Galdana II FCR class 1 19%, Galdana II RAIF awaiting Q4 metrics.

3. Galdana I FCR (7%), Galdana II FCR (18.7%), Galdana II RAIF (22%).

Note: Past returns are not necessarily indicative of future results given that the current economic conditions are not comparable to prior conditions, which may not repeat in the future. There is no guarantee that the Fund will have similar results as previous funds.

Galdana’s funds of funds refer to the Venture Capital funds managed by Altamar CAM Partners, SL.

Relevant Market Trends

Despite high levels of dry powder, **investment activity** has normalised to 2020/2019 levels, as managers are taking longer to carry out due diligence and negotiate deal term sheets.

Global Venture Capital Aggregate Deal Value \$B

Cybersecurity

Aerospace & drones

Supply chain & logistics

Retailtech

- The growth at any cost type of business model, on the other hand, has been significantly penalized in the current market environment, where cash is no longer "free" and cash-efficient companies are the ones attracting investments.

When it comes to **exits and liquidity**, IPO opportunities were very limited during 2022 in the US and Europe. Asia, on the other hand, has been the most active region with regards to IPOs.

- In 2022 Galdana portfolio's exits consisted of 7 IPOs (4 of them in China) and 41 M&As. Accumulated exits now total 139 IPOs and 142 M&As. Net DPI for Galdana I stands at 11%.
- During Q1 2023, we have already seen, within the Galdana portfolio, 4 IPOs in China as the country has lifted COVID restrictions and the economy is beating growth forecasts.
- In addition to this, the portfolio contains a large number of ready-to-IPO companies. The IPO market in the US and Europe is expected to reopen by H1 2024.

When markets are in a recession having exposure to the best global Venture Capital managers is even more important, as returns dispersion intensifies and investors fly to quality. This reinforces **Galdana's vision**.

- Overall, the top VC managers now face a landscape where competition is decreasing, deal flow remains very strong, investment pace has normalised and entry valuations have fallen. Expected target returns for the current vintages could therefore be very attractive in the long term.

Relevant Market Trends

Healthcare Market Highlights

- Healthcare Venture Capital deal activity declined in 2022 after a record 2021.
- This decrease was likely because investors, given the fast-rising interest rate environment and uncertainty in the debt and equity markets, directed new capital towards existing portfolios instead of new equity investments, raising convertible loans and focusing on hitting valuation inflections before the next financing round.

Healthcare Venture capital financing deals (EU + UK + US) in \$B

Source: *Healthcare Investments & Exits Annual 2022, Silicon Valley Bank SVB Research*

• **Total healthcare investment for the year still exceeded 2020, making 2022 the second-largest year ever.**

- Valuations were very high in 2021 and in recent months underwent a correction, which is especially visible in late-stage series. This valuation normalization can help investors access this market at more attractive valuation levels and reactivate M&A dealmakers in 2023.

Median VC Healthcare deal post-money valuation (Global) in €M

Source: *Pitchbook*

Demand for healthcare innovation and technology still far exceeds supply

- The need for new solutions to address chronic societal problems is as pressing as ever and health spending has outpaced economic growth for most of the last two decades.

- Healthcare accounts for 20% of the US GDP but only for 6% of tech spending, demonstrating upside for future technology spending¹.

- AI will bring a paradigm shift to healthcare. The declining cost of training models, along with the capacity to utilize data in vast amounts, could be a game changer for the sector.

Investing in the future

Real Assets showed strong performance in 2022, demonstrating resiliency and the ability to create value in times of uncertainty, high inflation and increasing interest rates.

- Our Infrastructure portfolio valuation increased 9% year-on-year as of Q4'22, with a consistent yield distribution above 3%.
- In Real Estate, our funds' valuation (TVPI) increased by 6% in 2022, and in 1Q'22 the sale of AltamarCAM's real estate core+ healthcare platform was closed, generating a 10% net IRR for investors.

The Real Assets team is well positioned to take advantage of the attractive global opportunity set by continuing to invest through our current offerings: :

- **ACP Sustainable Megatrends Co-investments**, a co-investment fund investing in Infrastructure assets targeting double digit returns combined with strong downside protection.
- **ACP Infrastructure Income III**, the continuation of a proven Infrastructure Fund of Funds strategy, creating a diversified portfolio of primaries, secondaries and co-investments with an attractive risk-return profile and strong downside protection.
- Compelling **direct opportunities** around high-conviction themes such as real estate, healthcare and rental and for-sale housing.

Note: Past returns are not necessarily indicative of future results given that the current economic conditions are not comparable to prior conditions, which may not repeat in the future. There is no guarantee that the Fund will have similar results as previous funds.

Infrastructure

- Given the essential nature of infrastructure assets, they continue to require high levels of investment and private capital participation remains key.
- Thanks to the attractive business models under which these assets operate, with stable cash flows and protection against inflation and interest rate hikes, infrastructure has proven robust and resilient in 2022: AltamarCAM's Infrastructure portfolio valuation increased by 9% in 2022, while equities and fixed income decreased by 17% and 10% respectively¹.
- Thus, investing in infrastructure offers an attractive risk-return profile with low volatility and low correlation with other public and private assets. As a result, private investors continue to increase allocation to this asset class, closing 2022 with a record \$173b of capital raised².
- Infrastructure remains well-positioned in the context of the complex and uncertain current macro environment, offering a strong hedge to inflation and interest rates, as demonstrated in past high-inflation environments.

Annualised return (% , 2003-2022)

Infrastructure Market Trends

Energy transition continues to gain relevance and, at the same time, decarbonization is impacting the entire asset class. Electricity demand is expected to increase by 25-30%, with a two-fold increase in production from renewable sources by 2030.

- Opportunities: clean energy generation, energy storage, energy efficiency.

Digital infrastructure assets are proving increasingly essential for daily life, to the point that they are starting to be considered as the “fourth utility”. Data consumption has increased 30-fold in the last 10 years and is expected to continue to grow at a rate of 40% per year for at least the next 5 years.

- Opportunities: infrastructure underpinning mobile networks and fixed-line networks, which are strategically important for internet traffic (fiber, towers, data centres).

Transport is a traditional infrastructure sector with continuous capital needs, with new types of assets coming on the scene.

- Opportunities in transportation arise from the recovery of the assets most impacted by Covid-19, as well as the need for electrification and decarbonization, and the trend towards outsourcing non-core assets.

Social infrastructure demand is increasing due to both demographic changes (globally, 1 in 6 people are expected to be over 60 in 2030, representing an increase of 40% compared to 2020) and urbanization trends. Current relevant infrastructure is ageing and in need of renewal.

- Opportunities: a wide variety of opportunities including hospitals, elderly care, administrative buildings, etc.

Real Estate – Market Trends & Portfolio Evolution

- The real estate investment landscape is evolving in response to the changing economic backdrop, as we enter an extended period characterised by higher costs of capital.
- While the COVID-19 pandemic brought about a change of utilization of real estate assets (e.g., the impact of remote working), this new environment is encouraging repricing.
- Equity and debt liquidity has dropped significantly, motivated by the increase of interest rates and macroeconomic volatility, leading to a correction in prices.
- However, there is a significant volume of dry powder waiting in the wings, wanting to capture the pricing correction, which may prevent very pronounced declines.
- In this new environment, AltamarCAM believes **attractive investment opportunities lie ahead**, including refinancing situations and public-to-privates. In general, a **“back to basics” approach is encouraged**.

- AltamarCAM’s real estate portfolio has been built on the back of sector and market selection and hands-on value creation, which resulted in a **positive performance in 2022** compared to negative performance across real estate indexes.

Real Estate – Fundamentals of Investing

Sector and market selection

- Real estate fundamentals show large disparity, with demand for sectors motivated by **megatrends like demographics and technology outperforming** GDP-driven sectors.
- Similarly, certain markets are seeing the benefits of **increased population immigration**, while other less desirable locations are struggling.
- In this context, AltamarCAM is focusing investment efforts around **high conviction sectors like logistics, “living” or healthcare**, in high-growth markets like **Sunbelt states in the USA and certain urban locations across Europe**.

Value creation

- As the period of low cost of capital and compressing real estate cap rates is behind us, a significant component of market beta is gone.
- **Investors implementing alpha generation strategies are expected to outperform** in this environment, with enhanced downside protection and increased upside potential.
- Asset management remains crucial to **protect and improve the value** of real estate assets.

1. Composite index assuming 60% INREV Annual Fund Index (Europe), 30% NFI-ODCE (USA), and 10% ANREV Annual Fund Index (APAC).

Private Credit

One of the best performing asset classes of 2022, as floating rate coupons and favourable underlying company performance turned direct lending into a winning strategy for investors.

Investing in the future

Our private debt portfolio performed well in relative and absolute terms in 2022 despite the complex market backdrop negatively influenced by macro trends and geopolitical risks.

- APD I's portfolio of almost 1,200 loans to European corporations returned 4.4% gross over the last twelve months.
- APD III's portfolio of almost 900 loans to European and US corporations returned 4.2% gross over the last twelve months in underlying fund reporting currency.
- ACGC II's portfolio of almost 850 loans to European and US corporations returned 4.2% gross over the last twelve months in underlying fund reporting currency.
- The blended direct lending portfolio has realised no losses since inception and only 1.6% of underlying companies have been restructured, despite the challenging conditions of the past few years.
- The average EBITDA in the Direct Lending portfolio is about €59m and average leverage stood at 5.2x as of Q4 2022.
- In the return enhancing market segment, avg MOIC on a deal-by-deal basis as of Q4 2022 was 1.10x.

Our private debt strategies offer investors an alternative to traditional fixed income markets, with a focus on:

- **Senior positions:** Top of the capital stack to navigate a challenging macro environment of over-levered economies.
- **Low duration:** floating rates tend to protect against a volatile rates environment, mitigating price volatility in investors' portfolios.
- **Capitalizing on market volatility** through opportunistic strategies to benefit from market catalysts like inflation, rate hikes, excessive leverage, supply chain dislocations and technological shifts.

Note: Past performance is not necessarily indicative of future results.

Relevant Market Trends

- The market continued to grow in 2022, driven by investor appetite for the asset class and the disintermediation of the banking sector. The two main groups of strategies are direct lending and return enhancing (primarily distressed debt and special situations).
- Direct lending investments saw another year of strong performance despite challenging market conditions triggered by the pandemic, the Ukraine war, inflation and rising rates. Mid-market company revenues grew above 12% in 2022, and 80% of the US mid-market companies experienced sales growth year-on-year¹ which contributed to keeping default rates low. As a result, the Cliffwater direct lending index continues to show an excess return over other fixed income markets.

- In the Return Enhancing market segment, the increased volatility and market dislocation, as well as the growth in the size of leverage loan, private loan and high-yield debt markets is starting to offer attractive entry points for opportunistic investors. Thus, at the beginning of 2023, more than \$160b of debt traded at distressed levels (defined as less than 80 cents on the dollar).

- The uncertain macro landscape and the expected increase in defaults will likely fuel investment activity throughout 2023. Interestingly, as shown in the chart below, vintages that experienced a recession in the US economy have been characterized by higher returns delivered by return enhancing strategies.

● US GDP YOY quarterly ● Distress and Special Situations avg return per vintage

- To navigate this environment, and the resulting return dispersion, investors should focus on skilled and seasoned managers with differentiated sourcing advantages that can harness the shift towards a lender friendly market, that could lead to the best vintages for Private Credit seen in a decade.

Digitalization: Main goals 2022

Altamar+

Altamar+ is a fully customized digital platform that allows AltamarCAM's team to store, manage and update relevant information in a proprietary repository, giving us greater flexibility and adaptability.

We are incorporating new Artificial Intelligence tools to help us automate the lower value-add tasks, and semi-automatically incorporate the information we receive from our GPs into our systems.

Placement Agents Platform

The main new feature developed this year in our Placement Agent Platform was Digital Onboarding clients. Our goal was to improve efficiency and the client experience. This has facilitated the registration of 1,700 new investors in less than a month. The platform also includes web access that allows bankers to directly monitor the digital signature process of their clients.

Data mart + Power BI

Our big data strategy consists of transforming the data from our core system into an accessible, trusted database that automatically delivers up-to-date, actionable dashboards to everyone in the organization.

LP Portal

It is a private and exclusive web portal for investors that provides online information & documents about clients' investments and their performance. We have more than 3,000 clients who use the portal frequently. An important new development over the past year is the inclusion of detailed reports on our mandated clients' portfolios.

Investing in the future

ESG

As a private markets solutions provider, AltamarCAM recognises the importance of ESG considerations in its investment decisions. As an investor, the firm has a unique opportunity to drive positive change by engaging funds in the generation of a positive social and environmental impact through the integration of ESG criteria.

Investing in
the future

ESG • 2

AltamarCAM believes that investing in funds committed to sustainability through the consolidation of ESG factors into their investment process and their active engagement with target fund managers, can make a meaningful contribution to building a fairer and a more sustainable world, while mitigating risks and providing sustainable risk adjusted returns.

Investing in the future

ESG • 3

As a result of its ESG efforts and progress, the firm received 4 awards in 2022 for its innovative work in the field of sustainability, reinforcing its leadership position in the industry and recognising its commitment to the development of technology-based projects to respond to current social and environmental challenges.

AltamarCAM included as one of the Future 40 ESG Innovators by the leading industry publication Real Deals.

AltamarCAM was awarded first prize in the category of Leading Investor in Sustainability Research, and came in second place in the category of Leading Company in Corporate Governance in Spain awarded by ALAS 20.

Montserrat Vendrell, a Partner at the Venture Capital fund Alta Life Sciences, has received recognition for her remarkable contribution to driving high-impact innovation in healthcare aimed at addressing unmet medical needs.

With the aim of generating sustainable value for its investors and to the Firm itself, AltamarCAM has made significant progress in its sustainability efforts over the past year:

Investing in
the future

ESG•4

ESG Assessment Model

AltamarCAM has developed a new ESG Assessment Model applied throughout the entire investment cycle by which GPs it invests in are assessed and categorised according to their commitment to ESG. The firm seeks to select funds that demonstrate a commitment to ESG principles ensuring their alignment with its core values. Active engagement with the GPs is performed through the ESG Due Diligence Questionnaire (ESG DDQ), ESG due diligence calls and the internal ESG Scoring Model is applied to evaluate the managers' ESG policies. The questionnaire underwent an update and redesign in 2022, transitioning to a much more granular list of questions in a new online format. The primary goal of this redesign was to conduct more detailed and tailored analyses for each asset type and to digitise the analysis process.

Ongoing monitoring

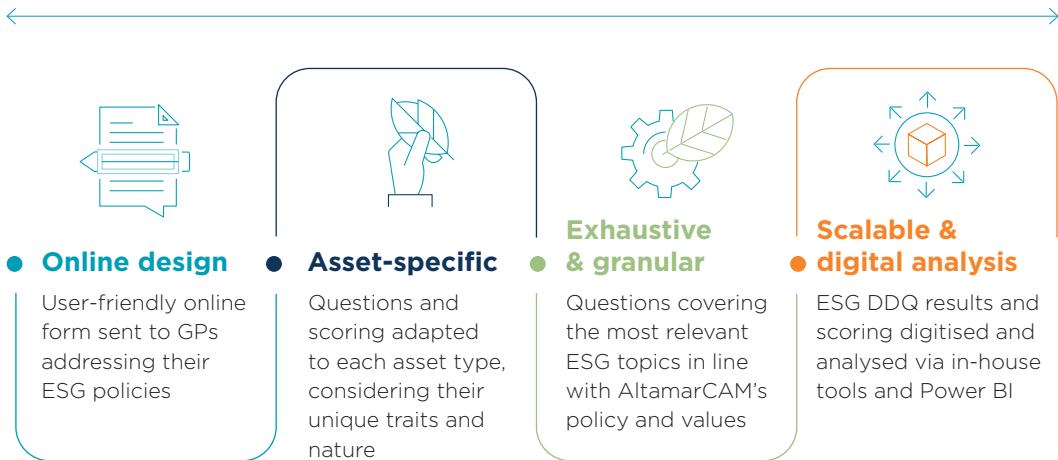

Figure 1. Detail on the redesign of the ESG DDQ

Additionally, initial steps were taken to evaluate portfolio company exposure to environmental, social, and governance (ESG) risks. These efforts will continue in 2023, as the firm seeks to expand its ESG analysis by drilling down into the underlying portfolio. Likewise, the ESG Policy has also been reviewed and updated in line with the latest ESG practices.

Climate Change and Carbon Neutrality

The fight against climate change is at the core of AltamarCAM's ESG Strategy. The Firm has achieved carbon neutrality at an operational level for four consecutive years, and has developed a comprehensive Climate Action Plan that outlines eight emissions reduction measures, with the aim of decreasing its reliance on offsetting credits. An updated travel policy and the introduction of sustainable mobility initiatives for employees, such as car-sharing, are some of the defined measures.

Furthermore, at AltamarCAM extended our collection of climate change data by requesting information on climate change risk management and portfolio emissions to GPs, among other data points. This helps AltamarCAM to have a better understanding of the portfolio's commitment to sustainability as it pursues its decarbonisation strategies.

Diversity and Inclusion Policy

One of the milestones of the year in the social dimension has been the development of the Diversity and Inclusion Policy. With 42% of females and 18 nationalities among the staff, the upcoming approval of this document represents the formalisation of a people management philosophy that AltamarCAM has followed since its foundation, aiming to create an inclusive and healthy workplace. This will help to continue fostering the promotion of unique employee perspectives and nurture a more innovative and dynamic culture.

AltamarCAM promotes diversity in the Financial Sector through its active participation in Level20 and Invest Europe's Diversity working group

Enhanced Transparency

AltamarCAM is pleased to announce the release of its first Corporate ESG Report, which covers the Firm’s comprehensive ESG framework, from the investment process to the corporate culture, ESG policies, related metrics, and evolution. AltamarCAM welcomes feedback from stakeholders on its ESG performance and invites them to review the ESG Report for more information.

Regarding the latest UN PRI assesment, both (pre-integration) firms (Altamar and CAM Alternatives) received strong scores significantly above industry averages. The firms announced their integration in mid-2021, therefore UN PRI reporting was conducted separately comprising procedures prior to the integration. From 2023 onwards, AltamarCAM Partners will report jointly in the upcoming reporting cycles.

Stewardship and Awareness

AltamarCAM understands the importance of building strong relationships with its partners and employees, working collaboratively to drive positive ESG outcomes and creating a sustainable culture that goes beyond the organisation. To this end, in 2022 AltamarCAM achieved several milestones, including the implementation of active monitoring of GPs identified as less mature in their ESG integration, mandatory ESG training for all team members, participation and representation in various ESG industry working groups/initiatives and events (including PRI in Person), and consultation and publication of ESG-focused articles.

Regulatory Context

Considering the widespread and growing interest in sustainable investing, and the increase in ESG-related regulatory requirements under the SFDR, AltamarCAM is fully committed to ensure compliance with disclosure requirements by aligning its procedures and reporting practices.

Moreover, in 2022 the AltamarCAM continued to expand its range of registered sustainable funds (Art. 8) and has been actively searching for ways to improve sustainable investment practices. AltamarCAM continues to explore the sustainable financial products market to further enrich their offerings. As a result of these efforts, the firm is delighted to announce the launch of ACP Aliath Bioventures II FCR Fund, their first impact fund, registered under Art. 9 of the SFDR.

Commitment Overview

AltamarCAM believes in the importance of accountability and transparency across its activities, having defined clear ESG goals that the firm is committed to track and report on:

Issuing AltamarCAM's first annual ESG report.

Sophistication of the internal ESG Assessment Model (ESG Scoring and DDQ).

Quantitative ESG performance indicators requested at portfolio level for all of Art. 8 and Art. 9 categorised funds.

Aim to exclusively launch Funds that meet the criteria for SFDR Article 8 or Article 9 classification.

Adapting the current ESG Policy to the different asset classes.

Intensifying engagement with LPs and GPs.

Boost the Firm's performance compared to peers to achieve top-tier results according to PRI criteria.

Extended efforts to measure portfolio carbon footprint.

Participating actively in initiatives promoting sustainability.

Achieve 78% of staff participation in the AltamarCAM Foundation activities.

AltamarCAM Foundation: Around the world

For the first time, in 2022 the Foundation supported a local project in every geography where the Firm is present, expanding its reach while leveraging the capabilities of the whole AltamarCAM team.

LITERACY PARTNERS

NEW YORK

The team in NY has supported families through a two-generation approach to education. With free classes, community workshops, and education media, low-income and immigrant parents and caregivers develop literacy and language skills that are necessary to succeed in today's world.

Every member of the team has participated as a volunteer at least once, impacting directly the lives of 200 immigrants in New York.

Friends of the Foundation

The Foundation collaborates annually with over 30 partner foundations that aim to have a social impact in education or health. These collaborations take various forms, including projects, fundraising events, collaborative activities, sports events, and projects without financial aid. Through these partnerships, the Foundation is able to leverage its resources and expertise to support a wide range of social initiatives. By working together, these organizations can make a significant difference in the lives of people in their communities and beyond.

Investing in the future

ESG • 22

The Foundation is committed to continuing to support these important partnerships and to finding new ways to collaborate with like-minded organizations in the future.

Impact Investing through the Foundations Fund

Fondo de Fundaciones de Impacto

The Impact Foundations Fund, in which the AltamarCAM Foundation participates, has concluded their first call for proposals and is loaning to two Spanish social enterprises that promote social inclusion and fight against rural depopulation: Apadrinaunolivo.org and RobinGood. The Foundation team alongside the Private Equity team helped select the project by analyzing the economic viability of the different projects presented.

Investing in the future

ESG • 23

RobinGood, was born as a social company that offers 'food with a soul'. They sell artisan, local and sustainable products (offering a range of sweet and savory snacks), made in workshops located in Catalonia, the Basque Country and Aragon for people with difficulties to access employment opportunities. The company, included by Forward Fooding among the 500 most outstanding global foodtech startups in 2022, employs 150 people with disabilities.

Apadrinaunolivo.org was born to fight against rural depopulation through the recovery and enhancement of thousands of abandoned olive trees in Oliete, a town in Teruel that has seen its population drop drastically in recent years.

2023 So far

JANUARY

2nd Aid to Ukraine: colleagues from the office in Cologne organized another aid shipment to Ukraine. Thanks to the financial support of AltamarCAM Foundation, more than 30 packages with medicines and first aid equipment could be sent again to help the victims of the war.

MARCH

'A Day in the Classroom': eleven volunteers participated in Madrid by sharing life lessons and messages that reinforce fundamental values for the personal and professional life of students in year 10.

FEBRUARY

Turkey and Syria Earthquake Fundraising for emergency relief: contributions from the team allowed a totally filled up trailer go to Turkey supplied with food, nappies, hygiene products, emergency goods and more, alongside 60 extra sleeping bags donated by the Foundation.

Together supporting growth and sustainability in Mozambique

Thanks to the amount raised among the team, and to funds of the Foundation, AltamarCAM will become a main partner of Humbi Farm this year, a key supporter of the growth and sustainability of Munti Center, in Praia Xai-Xai, Mozambique.

Since 2007, Munti Center has carried out projects focused on providing equal opportunities to children, young people and adults in education, nutrition and health.

Investing in the future

ESG • 25

What's Humbi Farm?

15-hectare farm that provides two meals a day for the 400-person Nutrition Centre

Its activity is expected to provide 10% of total income of Khanimambo

Serves as an example of good environmental and agricultural practices and inclusive employment

Together with sustainability, Humbi will also bring innovative practices, key to fulfilling Khanimambo Foundation's contribution to the social, economic, environmental and cultural transformation of Mozambique.
