Digitalization

At AltamarCAM, we believe in digitalization as one of the most strategic priorities. For this reason, since 2016 we have focused all our efforts on Digital Transformation, including Innovation as an added value in this last period and will continue to become a more digitalized firm.

Digitalization

Main Altamar IT Platform modules

Altamar Plus

Altamar + is a fully customized digital platform that allows AltamarCAM team members to store, manage and update relevant information in a unique repository, giving us greater flexibility and adaptability.

We are working on incorporating new tools with artificial intelligence to help us automate the lower value-added tasks, so that we can semiautomatically incorporate the information we receive from our GPs into the system.

Placement Agents Platform

The main new feature developed this year in our Placement Agent Platform was the Digital Onboarding. Our goal was to improve in efficiency and client experience. This has enabled the registration of 1,700 new investors in less than a month.

The platform also includes a WEB access that allows bankers to directly monitor the digital signature process of their clients.

BI: Data mart + Power BI

Our big data strategy was to transform all the data from our core system into an understandable, trusted database that automatically delivers actionable dashboards to everyone in the organization every day.

LP Portal

It is a private and exclusive web portal for investors that provides online information & documents about clients' investments and their performance. We have more than 3,000 clients who use the portal frequently. An important new development over the past year is the inclusion of detailed reports on our mandated clients' portfolios.
